Architecture

High level architecture overview

Requirements

Hard- and software requirements for our products

Requirements - Overview

Documentation

- ❑ [Citrix Product Documentation](#)
- ❑ [System requirements](#) (eLux)
- ❑ [System requirements](#) (Scout / ELIAS)
- ❑ [System requirements](#) (Scout Cloud Gateway)

Requirements (non-Unicon software)

- ❑ Windows Server 2022 or higher
- ❑ Microsoft SQL Server 2022 or higher
- ❑ Microsoft IIS including WebSocket Protocol
- ❑ Certificates (e.g. for Citrix access)

IP ports

- ❑ [Documentation: IP Ports](#)

Requirements - eLux 7

Minimum hardware requirements

- ❑ Processor: x86, 64-bit capable and powerful
- ❑ RAM: 4 GB
- ❑ HDD: 16 GB (8 GB are also supported, but only with limited functionalities)
- ❑ GPU: AMD or Intel chipset
- ❑ Network: Ethernet or WLA
- ❑ I/O ports: USB 3.0 or USB 2.0, USB boot support
- ❑ Resolution: 1920 x 1080 (Full HD)
- ❑ Boot mode: UEFI

Hardware compatibility list can be found myelux.com under each release of eLux 7

Requirements - Scout (Board)

Requirements Windows system

- ❑ Scout Server & Scout Console: Windows Server 2019 or newer
- ❑ RAM: 16 GB
- ❑ HDD: 50 GB free disk space
- ❑ MS .NET Framework 4.5.1 or later
- ❑ Suitable ODBC driver
- ❑ 600 MB hard disk space

Requirements database

- ❑ MS SQL Server 2019 or newer
- ❑ MS SQL Server Express

Requirements - ELIAS

ELIAS and MongoDB on one system

- ☐ RAM: 8 GB minimum
- ☐ HDD: 30 GB (depending on container installations)
- ☐ Microsoft Windows Server 2022 (or higher) or Linux Server Ubuntu 22.04
- ☐ Microsoft Internet Information Service (IIS) including WebSocket Protocol for automatic page refresh
- ☐ Web browser
 - ☐ Mozilla Firefox
 - ☐ Microsoft Edge
 - ☐ Google Chrome

ELIAS minimum requirements

- ☐ RAM: 6 GB minimum
- ☐ HDD: 10 GB

Requirements - Scout Cloud Gateway

System requirements

- ❑ Processor: 4 CPUs
- ❑ RAM: 8 GB RAM
- ❑ HDD: 24 GB

Virtualization platform such as VMware to install a virtual appliance via an .ova template

or

Configured Debian Linux system, Ubuntu 22.04 recommended

Network

- ❑ One IP address in the VPN address range for each connected eLux device
- ❑ Internal HTTPS access to the SCG WebAdmin interface (Interface for configuration and management)
- ❑ Bi-directional connection (via network card or firewall rules) of eLux devices to the Scout Server and of the Scout Cloud Gateway to the Identity provider

Requirements - Scout Cloud Gateway

Availability from the Internet

Management protocol between eLux and Scout Server

- ❑ For connecting the devices, the SCG server should be reachable from the Internet as FQDN. The default port for communication is 22125
- ❑ If you are running multiple SCG instances in a cluster, we recommend that you distribute the requests to the different instances via router

VPN port for connecting devices

- ❑ For cluster operation:
Each SCG instance requires a unique combination of FQDN and port for its VPN server.
- ❑ The administrator performs the configuration in the SCG WebAdmin interface, see Gateways

Internal availability

- ❑ HTTPS port **443** for connecting the WebAdmin interface (configuration, clustering, management)
- ❑ If Active Directory or Keycloak is used, the servers must be reachable
- ❑ Only virtual machines (.ova):
port 22 for access via SSH to the instance for administrative access (optional)
- ❑ **For cluster operation:**
MongoDB port 27017 for internal communication of the databases across the SCG instances
